HOLLAND BULBS

for Fall Planting

TEN BLUE RIBBON DARWIN TULIPS

The large, cupped blooms of the Darwin Tulips carried on long, upright stems are outstanding in May gardens. Their rich colors, in both brilliant and lighter tones, make a wonderful effect when the bulbs are planted in beds or borders. In the foreground of a shrub border or hedge where they will have a darker backing these Tulips are unforgettable. Enough of them should be included in every planting so as to have plenty for cutting.

PLANTING INSTRUCTIONS

You can grow imported Holland bulbs almost anywhere . . . they require so little care that they seem to grow by themselves.

To enjoy the lovely flowers in spring, remember to plant them this fall.

For best results loosen the soil about a foot deep. Plant Tulips, Hyacinths and Daffodils

5 to 6 inches deep and 5 to 6 inches apart, Heralds of Spring and Crocus 3 inches deep and 3 inches apart.

Heralds of Spring and Crocus bloom first, early in March. Hyacinths and Daffodils or Narcissus follow a few weeks later, then early Tulips burst into color. Last come the tall Darwin and May-flowering Tulips.
